Tour Guide Booking Platform – Project Scope Document

By Abuzar Hindi – (Click Visit Portfolio)

This document defines the complete scope, user roles, and functionality of the Tour Guide Booking Platform for Phase-1, along with a brief outline of Phase-2 enhancements.

1. Project Purpose

The platform is designed to connect tourists with verified local guides in Ayodhya. It provides a structured booking system with centralized administration to ensure trust, clarity, and smooth coordination between tourists, guides, and the platform administrator.

2. User Roles Overview

Role	Description
Tourist (Client)	Browses guides without login. Registration required only for booking and Payments.
Guide	Verified local guide with profile, availability, and booking visibility.
Admin	Platform owner with complete control over guides, bookings, messages, and payments

3. Tourist (Client) Features

- Browse website and guide profiles without login
- Search guides by location (Ayodhya)
- View guide profiles with profile picture, details, pricing, and reviews
- Sort guides by price or rating
- Register and login for booking
- Book guides with selected time slots
- Provide meeting location details during booking
- **VIP Pass booking option** (separate priority slot with **premium pricing**)
- Online payment via secure payment gateway
- View booking status (confirmed / cancelled)
- Send messages (messages are received by Admin only)

4. Guide Features – Phase 1

- Guide registration with admin verification
- Profile management including profile picture and personal details
- Set and manage available time slots
- View booked and available slots
- View booking history
- View reviews given by tourists
- Admin-assigned unique Guide ID for identification and tracking
- Update booking status such **as 'On the Way' and 'Reached**
- View summary of total bookings and completed services

5. Admin Panel Features – Phase 1

- Central admin dashboard
- Approve, reject, or cancel bookings
- Receive and manage all user messages
- Verify, approve, or block guides
- Manage guide profiles and listings
- Receive all payments through the platform
- Update pricing and VIP Pass charges
- Receive notifications for new bookings and messages via email.

6. Payment & Booking Handling – Phase 1

All payments are process securely through an online payment gateway. Payments are receive by the platform administrator, ensuring centralized control. Refunds are support as per platform policy.

7. Technology Overview – Phase 1

Layer	Technology

Frontend	React.js
Backend	Node.js (API-based architecture)
Database	Secure cloud database
Payment Gateway	Razor pay
Authentication	Role-based secure login
Hosting	Cloud deployment

Phase 2 – Future Enhancements

- Live location tracking between guide and tourist after booking
- Push notifications for admin and guides
- Automation of booking and payment workflows (like 80-20 split rule)
- Advanced reporting and analytics
- Expansion to additional cities
